

Job Description

Job title	Test Automation Analyst
Location	Hybrid – Regular travel to Central London
Role description	As a Test Automation Analyst, you'll be responsible for the design, execution, and maintenance of automated tests using the Triangle Test Automation product. You'll work closely with developers and stakeholders within assigned scrum teams covering the full trade life cycle.
Reporting responsibilities	Reporting to the Test Manager.
Requirements	<ul style="list-style-type: none"> ▪ Experience in designing test automation for complex business critical systems. ▪ Proficiency in SpecFlow (Reqnroll), API testing, SQL, GIT and Azure Pipelines. ▪ Strong communication and collaboration skills. ▪ Proactive approach to problem solving.
Additional skills & experience	Experience in Energy Trading or Capital Markets is a strong plus. BSc in Computer Science or related field.

There's really no such thing as a "perfect" candidate. If you feel you've got the skills and potential for the role but don't tick every single box on the list, we'd still love to hear from you.

We're committed to creating a workplace where everyone feels included, respected, and supported. Different perspectives help us grow, innovate, and do our best work, so we truly welcome applicants from all backgrounds, cultures, and experiences.

We're proud to be an equal opportunity employer. That means we do not discriminate based on race, ethnicity, religion, gender, sexual orientation, disability, age, or any other protected characteristic. Our recruitment process is built to be fair and transparent, giving every candidate an equal chance to be part of what we're building.

If you need any adjustments or accommodations during the recruitment process, just let us know, we're here to help.
